Cron jobs are not running on stage. Need to look into it. For now can you please check QA? <http://adorama.qa.aistg.com/>

I don't see a lot of ALC content in the megadrops tough.

Hi Steven,

One field missing in the feed is <AssociatedSKUs><Primary/>. Can you also provide data for this in order to fully test all the features related to ALC?

Thanks,
Nikki.

Glen Holman Wed, 22 Jun 2011 at 4:34pm

For one thing, the megadrops on QA do not have the right categories.

The categories are correct on stage.

Nikk,

How will <AssociatedSKUs><Primary/> work? What if the article is about many SKUs? Please paste here how the XML should look.

Thanks
